4. Determine relationships/cardinalities

1-M = 1 to Many

M-M = Many to Many

Industry 1-M Client - one industry serves many clients

Client 1-M Project

Project M-M Consultants

Location 1-M Clients

Location 1-M Consultants

Clients 1-M Contracts

Contracts 1-M Projects

Clients 1-M Projects

Project Status 1-M Projects

Consultants M-M Projects

Consultants M-M Specializations

Projects 1-M Time

Consultants 1-M Time

Projects 1-M Invoice

Clients 1-M Invoice

Invoice 1-M InvoiceItem

Method of Payment 1-M Payments

Invoice 1-M Payments

5. Complete Data Modeling that supports both business operations and insight-driven analysis to improve business performance
